

PRESS RELEASE

TOWN OF ELMIRA
1255 W. Water Street
Elmira, NY 14905

Date: January 31, 2025

The Town of Elmira Planning Board has its regularly scheduled public meeting on February 3, 2025 at 7:00pm. On the agenda is the board's continued consideration of an application from Carson Power Renewable Energy for site plan and special permit approval for a proposed solar and battery storage project on 200 West Hill Road. The planning board received a request from Carson Power to adjourn the meeting so a larger venue could be secured to accommodate the number of people expected to attend the meeting. Carson Power has also waived the condition that requires the planning board to act within 62 days of the close of the public hearing and to extend the time for the planning board's consideration. The planning board will hold its regular scheduled meeting but it is anticipated that the board will adjourn consideration of Carson Power's application until the next meeting on March 3rd at 7:00pm.
